

BEETHOVEN'S 5TH SYMPHONY - MARCIN PATRZALEK TAB

Thank you for purchasing this tab and supporting my music! Beethoven's 5th Symphony is an extremely challenging arrangement and this style is particularly difficult to notate/tab, so while learning I recommend you closely follow the official video on my Youtube channel:

www.youtube.com/marcinpatrzalek

This piece is from my **revAMP** EP which you can find on marcinpatrzalek.com Spotify etc.

In the purchased folder you will find one Guitar Pro 6 file (.gpx) and two PDF files. If you would like to use mainly tabs and use standard notation for rhythm, I recommend using the (*NormalPDF*) file.

I believe this is the best way to learn this piece.

However, if you would like to learn the arrangement using primarily standard notation (the classical way) I recommend going into the folder *Transposed Notation*,

where you will find a PDF file which is transposed to be read like the piece was in standard tuning.

I believe this will help you greatly.

The tuning is Cmin Open - CGCGCEb

Good luck & Have fun!

-Marcin

The track was mixed by Piotr Patrzalek:
